SUMMARY

Full Stack Engineer specializing in Next.js, React, TypeScript, Node.js, and Python, with strong expertise in secure API design, cryptography, distributed systems, and cloud-native architecture. Currently contributing to an enterprise-grade AI cybersecurity platform at SENTRIX, working across backend systems, frontend engineering, DevSecOps, and observability pipelines. Experienced in building scalable, production-ready systems with a focus on security, performance optimization, and reliability.

EXPERIENCE

SENTRIX | TALENCIAGLOBAL

Mar 2026 – Present

Intern

Chennai, India

- Implemented policy-based AI security controls using OPA to mitigate prompt-injection and data-exfiltration attack vectors during internal security testing.
- Built an AI observability platform using OpenTelemetry, ELK, Prometheus, and Grafana, enabling real-time monitoring across 10+ distributed services.
- Contributed to a distributed security control plane spanning 11 enterprise security domains, improving system visibility, centralized alerting, and incident response workflows.

XENKRYPT TECHNOLOGIES

Dec 2025 – Mar 2026

Frontend Development Intern

Chennai, India

- Built and deployed a Next.js 14 company website from scratch, then optimized rendering strategies and assets to address performance bottlenecks, improving Lighthouse scores and reducing page load time.
- Built Encrypti-V to solve secure communication gaps in multi-tenant environments, enabling isolated, privacy-focused email and secure cloud storage workflows.
- Designed REST APIs and structured PostgreSQL schemas to handle scalability and data consistency challenges, optimizing queries, indexing strategies, and data models to support high-performance backend services.
- Solved risks of data exposure during file transfer by implementing end-to-end encrypted, quantum-safe file sharing using AES-256-GCM and ML-KEM for secure transmission and storage.

PROJECTS

Argus — Secure Intelligent Query Gateway | *Python, FastAPI, PostgreSQL, Redis, React, Docker*

- Built an AI-powered database gateway that enables secure natural-language querying and analytics across enterprise data sources.
- Designed a multi-layer security architecture with authentication, RBAC, encryption, PII protection, auditing, and threat detection controls.
- Developed an intelligent query pipeline combining NL-to-SQL generation, validation, optimization, caching, and policy enforcement before execution.
- Implemented real-time observability, cost governance, and administrative tooling for monitoring, compliance, and operational insights.

Cognita — AI Engineering Intelligence Platform | *Python, FastAPI, LangGraph, React, PostgreSQL, Celery*

- Architected and built an AI-powered engineering intelligence platform that transforms GitHub activity into actionable insights on team health, code risk, and engineering productivity.
- Developed a 4-node LangGraph agent workflow with anomaly detection, insight generation, and human-in-the-loop approval for automated remediation actions.
- Implemented multi-tenant services with GitHub OAuth, encrypted token storage, Celery-based background processing, audit logging, and external integrations for Jira, Slack, and email.

TECHNICAL SKILLS

- Languages:** Python, TypeScript, JavaScript, C++, Rust
- Frontend:** Next.js, React.js, Tailwind CSS, HTML5, CSS3
- Backend:** Node.js, Express.js, FastAPI, REST APIs, Microservices
- Databases:** PostgreSQL, MongoDB, MySQL, Redis
- DevOps & Observability:** OpenTelemetry, Prometheus, Grafana, ELK Stack, Docker, CI/CD, GitHub Actions
- Tools:** Git, GitHub, Postman, Figma

EDUCATION

SRM Institute of Science and Technology

Chennai, India

B.Tech in Computer Science and Engineering | **CGPA: 9.76**

2023 – Present
